The team discussed various topics including accessing the meeting transcript, using Cloudinary for image storage, logo design, presentation schedule, task assignments for different pages, SQL installation on Azure server, finalizing site map, and scheduling the next meeting.

- The team discussed the issue of accessing and copying the meeting transcript, and decided to summarize it instead.
- They talked about using Cloudinary for image storage and mentioned that Miles would finish the logo design.
- They discussed the presentation schedule and agreed to have it done by the sixteenth.
- The team discussed assigning tasks for different pages, including profile, about us, and contact pages.
- They mentioned the need to install SQL on the Azure server and finalize the site map.
- They planned to have a meeting on Tuesday at 10 AM and continue working on their assigned tasks until then.
- Miles to send Figma wireframe to the team
- Miles will redesign the logo, potentially removing the "chunks" in the back. (make it into dolphin fin)
- All team members should download XAMPP for working with PHP.
- Derek to work on the profile page and SQL tables
- Joe will work on creating forms, potentially using notes from intro class.
- Everyone should review and update the project board.
- Heidi to work on the contact us page
- Everyone to base their pages off of the wireframe and add any additional ideas while keeping consistency in theme
- Cooper to work on the about us page
- Next meeting scheduled for Tuesday at 10 AM for a progress check-in
